

Hawt Fox WHITEPAPER

1.1. Why Whitelist mint?

- So-called «fair NFT launches» are not actually fair. In fact, they are overrun by bots and insiders
- We prefer that real people mint Hawt Foxes
- A whitelist mint concept enables us to select our future holders
- Significant amount of whitelist spots will be given to selected communities

1.2. Overview

Our mission at Hawt Fox is to create a limited collection that generates passive income through executable and sustainable business model.

- Total Supply: 910 [25 foxes pre-minted]
- Mint Price: 1 SOL [TBA depending on the state of the market]
- Mint Date: TBA

1.3. Sources of income

- Ethereum mining farm [6-8 GH/s target hash]
- 40% of Revenue from secondary market sales [Sales Tax]

1.4. Value of holding

- Weekly payments in Sol [2 sources of income]
- Equal distribution of revenue between Hawt Fox holders

1.5. Why mining farm (primary source of income)?

- By mining, it is possible to earn cryptocurrency [POW coins] without having to put down money for it [ETH = best returns]
- The more graphic cards we have in the farm, the more money it generates
- Founder has been farming since December 2020, has exclusive access to Nvidia GPUs
- Mining farm business model advantages [compared to other passive income ideas]:
 - ✓ Executable [mining rig can be built in a relatively short period of time]
 - ✓ Sustainable [graphic cards hold their value over time]
 - ✓ No Ponzi element [no pyramid schemes]

1.6. How we are planning to use sale proceeds?

- 500-600 Sol for expanding the mining farm [aiming at 60-80 GPUs, already have 11 RTX 3000 series GPUs]
- Rent a 24/7 monitored facility specifically for the mining farm
- Community engagement, contests and team salary
